Asociacion Defensa Social Argentina (ADSA) is alleged to be currently engaged in the following anti-Communist activities:

1. With the cooperation of its members who are employed in the Central Bank, ADSA is attempting to ascertain if any prominent Argentine politicians are in the pay of the Soviets.
2. The organization is seeking to expel all known Communists from the union of metallurgical workers. It is reported that with the help of the police ADSA has already succeeded in having some Communists removed from the TAMET and FAMAC metallurgical establishments.
3. The small establishment at Calle Mexico 915 of one Marcelo Tossi, who is said to manufacture and repair guns, was placed under surveillance. Communists have been observed to frequent Tossi's shop.
